# PUMP \& EXPANSION TANKS 

PMI 2/5/7/14
PM 14/20/26/32/45/65/85/86/119
PMH 7/14/20
PMC 10
PMET 2/5/7/14

## Pump tank

- Non-corrosive metal air valve
- 100 PSI working pressure
- Multiple head construction provides added structural strength and more capacity within the same diameters.
- Interior powder coating is permanently bonded to the tank shell to provide the ultimate protection on the water side of the tank.
- Durable butyl rubber parabolic diaphragm ensures long life and prevents rubbing on tank wall or rolling over on itself.
- Positive lock retention system ensures quality controlled compression in the diaphragm. The connection eliminates loss of air or water leaks in the tank.
- Electrostatically applied powder coated exterior. Tough powder coating provides maximum resistance to sunlight (UV) and is undercoated with zinc phosphate for the highest corrosion resistance.
- No-weld Guard steel base

## Potable \& hydronic expansion tank

- Drawn steel construction
- Heavy duty butyl rubber diaphragm
- Maximum working pressure 150 PSI - potable only
- 100 PSI max - hydronic only
- Powder coated interior and fitting
- Drawn steel construction

## SAMPLE SPECIFICATION

The tank(s) shall be A. O. Smith Model Number PM $\qquad$ or an approved equal. Tanks(s) shall be rated for 100/150 psi working pressure. Vessel shall be internally coated for corrosion protection. A durable butyl diaphragm will ensure long working life. The complete product will be NSF 61 certified and listed.
