

AQ-5300 Series

Water Filtration Treatment Systems

- 3-Stage water filtration system
- High capacity filters that eliminate foul tastes and odors in the water.
- Reduce up to 99% of 77 contaminants
- Perfect tasting drinking and cooking water
- Faucet comes in three designer finishes, Chrome, Brushed Nickel or Oil-Rubbed Bronze.
- More cost effective and eco-friendly than using regular or dispenser sized bottled water
- For cold water only
- Compact and stylish design.
- Claryum® Technology filters
- Filter replacement indicator

NSF Certified Claryum® filtration technology

Independently tested and proven to remove over 97% of chlorine and chloramines. Also reduces:

- Heavy metals like lead and mercury
- Chlorine resistant cysts like giardia and cryptosporidium
- Organic chemicals like herbicides, pesticides and VOCs
- Pharmaceuticals like estrone and ibuprofen

ECO Friendly

Designed with the environment in mind! Intelligent system design reduces plastic waste by minimizing disposable plastic parts.

Increase Performance

Extend the life of your system and improve effectiveness. Three Stage System features a 20 micron pre-filter to capture rust, sediment and silt that can clog your system. Extends filter life capacity to 600 gallons!

A Smarter System

Once filters are at 95% capacity (about every 6 months) the AQ-5300 alerts you it's time to replace them. No more guessing if and when you need to replace your old filters.

Filter stages - Claryum® Technology

Filter type	Explanation
Activated Carbon	Reduces pharmaceuticals, herbicides, pesticides, VOCs and MTBE.
Catalytic Carbon	Targets chlorine and chloramines.
Ion-Exchange	Filters heavy metals like lead and mercury.
Absolute Sub-Micron Mechanical Filtration	Captures asbestos and chlorine resistant cysts like cryptosporidium and giardia.
