

Frezya 300 Series

The only extra thing in your water is healthy minerals, with its alkaline filter.

- Fresh Water Supply at any time: 4-12 °C cold and 70-90 °C hot water
- Eco Mode and Power Saving Functions
- Continuous Water Dispensing Function
- Removable Water Faucets
- Reverse Osmosis Filtration System
- Hot Water Safety Button and Functions
- Water Level Control Function: Automatic water level control function ensures durability of the filters & unit.

The Frezya series is perfect both for your house and office with its countertop and full size models. It is a hygienic and economic new generation water dispenser with its hot and cold water options, an alkaline filter that increases the pH level of your water, and its reverse osmosis technology that removes harmful substances, bacteria and viruses from your water.

Cold or hot water as you please and easy with every sip...

The Frezya series can produce cold water at 4-12 °C and hot water at 70-90 °C. With its detachable water outlet and stainless steel tanks, Frezya always makes sure that the water you consume is completely safe. Its reverse osmosis technology eliminates all contaminants, bacteria and chlorine from your water and provides you with a safe drinking experience.

An alkaline filter that makes sure your water has a pH over 8.0...

With its alkaline filter, Frezya puts beneficial minerals such as calcium, magnesium, sodium, and potassium back in your water. It increases the pH value of your water to over 8.0, making it alkaline. Give your body the boost of additional minerals and alkaline water.

Protects you from burns

With its automatic hot water lock, anti-overheating function (by manual reset type of bi-metal) and automatic temperature control function (by automatic reset type of bi-metal), Frezya protects you from being scalded by hot water.

Huge cost savings!

Frezya's Eco Mode Technology saves energy by automatically turning off the system at night with its photo detector. You can also make further savings by deactivating one of the heat control buttons depending on how often you use hot and cold water.

Long-lasting.

Frezya's automatic water level control function improves the lifetime of its purification filters.

Model Name	Frezya 300S Free Standing	Frezya 300 TU Counter top
Power Supply	220V - 50Hz	
Current	2.7A	
Feed Water Pressure	0.5-5.8 Bars (7-85 PSI)	
Permitted Water Temp.	5-35 °C	
Capacity	App.280 lt/day	
Hot Water Tank	AISI 304 - about 1.8 L	AISI 304 - about 1.4 L
Cold Water Tank	AISI 304 - about 3 L	
Cold Water Temp.	4-12 °C	
Hot Water Temp.	70-90 °C	
Heater Power Consumption	400-470W	
Motor Power Consumption	90W (0.7 A)	
Refrigerant	R-134a CFC	
Climate Class	T<IPX1>	
Usable Feed Water	Municipal Tap water	
Recommended Environment	Indoor (House / Office)	
Dimensions (Wx Dx H)	260x360x1100 mm	260x485x495 mm
Net Weight	21 kg.	17 kg.

Filter stages

Stage	Cartridge Filter	Explanation
1	>0.5 µm Sediment Filter	This stage filters rust, sand, other larger particles and solid impurities suspended in the water.
2	Pre-Carbon Filter	Absorbs chlorine, mould, disinfection by-products, odors, discolorations and other materials in the water.
3	>0.001 µm R.O. Membrane Filter	It can effectively remove bacteria, viruses, heavy metals, pesticide residue, and other harmful substances and realizes microbiological and chemical purification.
4	Alkaline Post Filter	This filter regulates the taste and smell of water and keeps the water fresh.

Removable faucets

Easily removable water faucets will be a hygiene guard to help keep hot & cold water faucets always clean.

Continuous Water Dispensing

With this function, you can conveniently receive a large amount of water at once.

Hot Water Safety Button

No accidental dispensation of hot water with the hot water safety button option.
